Objective

Motivated preparatory student at ENSA Fes with foundational skills in Linux, C programming, and cybersecurity. Seeking a short-term remote internship or freelance opportunity to apply my knowledge and gain practical experience in IT support, data entry, or cybersecurity.

Education

1st year of the engineering cycle, ENSA Fes — June 2028

Focused on engineering fundamentals including programming, structures, and basic Linux.

Pursuing a degree in computer engineering, artificial intelligence and digital trust.

Skills

- Linux: Basic command-line usage, file management, and hands-on exploration of Kali Linux tools
- Programming: Basic knowledge of C language, debugging, and coding practice
- Cybersecurity: Curious and self-motivated learner with introductory understanding of network security tools
- Microsoft Office: Proficient in Word, Excel, PowerPoint (document formatting, data organization)
- Languages: Arabic (native), French (fluent), English (fluent), German (intermediate), Spanish (intermediate)
- Soft skills: Quick and self-motivated learner, detail-oriented, motivated, responsible

Projects & Experience

- Part of the team developing a website for renting electric scooters between students inside "ENSA FES" as part of our final year project of environmental studies and objectives of sustainable development. Link of the website: <https://blacarbon.store>

- Personal C programming projects: Developed and debugged small programs as part of coursework and self-learning
- Kali Linux exploration: Practiced basic cybersecurity tools and techniques for personal learning and part of the SecOps club at ENSA Fes

Additional Information

- Available for remote, short-term (2 months) internships or freelance work all year long
- Flexible with working hours and quick to adapt to new tasks
- Eager to expand practical skills and contribute effectively to team goals
